Objective

qa automation engineer with 5 years of experience designing and maintaining scalable web, mobile, and API test automation frameworks. Seeking a senior qa automation engineer role to strengthen release quality through Selenium WebDriver, Playwright, Java, TestNG, REST Assured, CI/CD, and backend validation.

Professional Summary

- qa automation engineer experienced in manual and automated testing for B2B2C fintech platforms, investment products, KYC, VKYC, AML, dedupe, payment, and webhook integrations.
- Builds maintainable automation frameworks using Selenium WebDriver, Playwright, Java, TestNG, Maven, Page Object Model, Cucumber, Appium, REST Assured, and Postman.
- Improved regression efficiency through Jenkins CI/CD integration, data-driven testing, cross-browser coverage, API/UI integration testing, and backend validation using MySQL, MongoDB, and Redis.

Core Skills

TechnicalSkills: Selenium WebDriver, Playwright, Java, TestNG, Appium, Maven, Page Object Model (POM), BDD, Cucumber, REST Assured, Postman, Swagger UI, API Testing, UI Testing, API/UI Integration Testing, Functional Testing, Regression Testing, Integration Testing, Smoke Testing, Sanity Testing, JMeter, SQL, MySQL, MongoDB
SoftSkills: Agile/Scrum, Test Strategy, Test Planning, Requirements Analysis, Defect Investigation, Root Cause Analysis, Stakeholder Collaboration, Cross-Functional Collaboration, Communication, Problem Solving, Mentoring, Stakeholder Management

Professional Experience

QA Automation Engineer – Fixerra Feb 2024 – Present

- Served as a qa automation engineer developing Java, TestNG, Maven, and Page Object Model frameworks for web and API testing.
- Automated NTB and ETB fintech journeys covering onboarding, KYC, VKYC, AML, dedupe, payments, resume journey, and investment flows.
- Validated REST APIs, webhook callbacks, issuer integrations, and backend data using REST Assured, Postman, MySQL, MongoDB, and Redis.
- Integrated Selenium WebDriver and Playwright suites with Jenkins CI/CD, Git, AWS services, and Extent/Allure reporting.
- Reduced manual regression effort by 60% through reusable automation utilities and data-driven framework design.
- Improved regression execution efficiency by 70% through framework optimization and continuous Jenkins execution.
- Strengthened release quality by identifying critical defects during UAT, regression, API, and backend validation.

QA Engineer – Fintso Sep 2021 – Jan 2024

- Built Selenium WebDriver automation using Java, TestNG, POM, data-driven testing, Extent Reports, and cross-browser execution.

- Created Cucumber BDD scenarios and Appium tests for Partner and Client applications supporting mutual funds, fixed deposits, global investing, and stocks.
- Automated API validation with REST Assured and Postman, including API chaining, authentication, headers, and JSON schema validation.
- Performed functional, smoke, regression, integration, database, and defect testing using Jenkins, Git, JIRA, MongoDB, and Redis.
- Increased automation coverage for critical fintech user journeys by 70% through web, mobile, and API automation.
- Improved backend reliability by correlating API responses with MongoDB and Redis data validation.
- Accelerated release feedback through Jenkins CI/CD integration and repeatable cross-browser test execution.

QA Automation Engineer Fellowship – Bridgelabz Feb 2021 – Aug 2021

- Developed Selenium automation scripts for e-commerce and travel applications using browser-based functional and regression testing.
- Executed cross-browser compatibility testing and documented defects to validate consistent application behavior.
- Improved regression confidence through repeatable Selenium coverage across supported browsers.

Projects

Digital Fixed Deposit Investment Platform

- Owned end-to-end testing for issuer-specific FD journeys from login and KYC through resume journey, review, payment, portfolio, callbacks, and VKYC. Automated NTB and ETB flows and validated AML, dedupe, API integrations, webhook responses, and backend records.
- **Tools:** Java, Selenium WebDriver, TestNG, Maven, REST Assured, Postman, SQL/MySQL, Jenkins, Git, AWS, Extent Reports, Allure Reports

Resume Journey Test Automation

- Automated the KYC-to-Review & Pay journey using Playwright with combined API and UI checks, dynamic test data, multi-browser execution, structured reporting, and reusable multi-issuer coverage.
- **Tools:** Playwright, API/UI Integration Testing, Extent Reports, Allure Reports

Wealth Management Platform

- Tested Partner and Client applications supporting mutual funds, fixed deposits, global investment, and stocks through web, mobile, API, functional, smoke, regression, and integration testing.
- **Tools:** Java, Selenium WebDriver, TestNG, Extent Reports, Appium, Postman, REST Assured, Jenkins, JIRA
